

Working together

Agivir

Membranes with antiviral surfaces for applications in public and high-traffic areas (schools, offices, shops, transport, hospitals, health care facilities)

A major innovation

— serving the fight against **Coronaviruses**

As part of the fight against Coronaviruses, the Serge Ferrari group has developed and filed patents for a technology which makes its surfaces virucidal.

These antiviral properties have been validated by an independent laboratory. Using technology based on silver particles, recently mentioned in scientific literature for their antiviral properties, these techniques make it possible to offer a wide range of solutions to combat the current pandemic.

VirHealth laboratory results

The results obtained by comparing two membranes (one treated, the other untreated) demonstrate a reduction in the number of viruses present on surfaces of:

95%

after 15 minutes' contact

99,5%

after 60 minutes' contact

Source: independent VirHealth laboratory based on the Coronavirus 229E ISO 21702 standard, representative of human Coronaviruses. Minutes can be consulted on our website: <https://serge-ferrari.keepeek.com/m5na6P34Q>

The Serge Ferrari Group designs, manufactures and distributes high-technology flexible composite materials, for lightweight architecture applications and outdoor fittings. The Serge Ferrari high-end solutions combine durability, security, design, comfort and eco-responsibility.

Technology sustainability

The technology's durability and efficiency have been designed to be compatible with the targeted applications.

It is important for surfaces to be kept clean to maintain the product's efficiency.

Operating principles for silver particles

The Serge Ferrari group has developed technologies for introducing silver particles into its membranes to ensure optimal inking.

1 Protective cover

100% waterproof membrane complying with fire standards for interior applications - M1.

Highly resistant membrane, ideal for customised covers installed in areas with high traffic.

Target applications

Protective covers for classroom and canteen furniture (chairs and tables), specific covers for play areas

Security gates and handrails

Trolley handles

2 Stickable protection

High performance, repositionable adhesive membrane that can be cut to size as required. Making it the first choice for Hospitals, Hotels, Offices, Supermarkets, Pubs, Shops and Schools to list a few.

Target applications

Door push plates, security portals and handrails

Tables, desks, counters and checkouts

3 Mobile or fixed partition

A lightweight and adaptable membrane for all existing partitions (divider walls, barriers, box partitions) with a high-end look and feel.

Easy to maintain.

Target applications

Cafes, hotels and restaurants with partitioning needs to maintain social distancing

Schools and offices to create healthier surfaces

Places open to public to manage the flow.

Specifications techniques

	AGIVIR™ COVER	AGIVIR™ COVER M2	AGIVIR™ STICK'ON	AGIVIR™ LIGHT
WIDTH	178 cm	178 cm	160 cm	150 cm
WEIGHT	530 g/m ²	590 g/m ²	510 g/m ²	300 g/m ²
FORMAT	50 ML	50 ML	25 ML	50 ML
FIRE CLASSIFICATION	B,s1,d0 - M1 ⁽¹⁾	B,s2,d0 - M2 ⁽¹⁾	M1 ⁽¹⁾⁽²⁾	-
ANTIVIRAL APPLICATION	2 faces	2 faces	1 face	1 face
COLOR	White	White	White and grey	White
ASSEMBLY	welding or stitching	welding or stitching	adhesive	stitching
EXAMPLES OF APPLICATION	Caddies and basket handles, door handles, stair railings, turnstiles and metros revolving doors, handrails, waste disposal areas, elevators and play areas, desks, tables, chairs	Transport areas, shops, companies, hotels, restaurants in outdoor applications	Hospitals, Hotels, Offices, Supermarkets, Pubs, Shops, Checkout lines, stairs railings, grab bars, handrails, door handles and bars, elevators, toilets, door push plates, receptions / counters	Desks, chairs, tables

The use is in addition to the sanitary protection measures recommended by the competent authorities. Please use virucides with care. Before use, read the label and product information.

⁽¹⁾Based on the standard NFP 92-507

Agivir™ is only available in Europe.

Serge Ferrari Partners

We work in close association with our partners who are specialists in the fields of industry, construction, housing and boating. Their extensive presence and specific expertise make these close-knit Serge Ferrari partners genuine allies for successful completion of your projects, such as Fabricworks.co.uk

For local authorities, hospitality, retailers and manufacturers, individual customers, commercial and public buildings, retirement homes

Fabricworks.co.uk have the specific expertise required to meet all your demands in the field of fabric, fabric manufacture and installation.

Offering expertise in:

Solar protection for homes and commercial buildings.

Exterior & Interior Tensile Structures

Acoustic solutions

Fabric installation

Fabric Patterning

Office Interiors

Exhibitions

Fabricworks wealth of knowledge with fabric and installation puts them well placed to assist you with your AGIVIR purchase, be it ex-works or a full installation package.

AGIVIR™ STICK'ON lends itself perfectly to ex-works supply as it's simple to cut and install by a competent individual
